

COURTFACT[®]
KIOSK

IN-OFFICE OPERATIONS MADE CUSTOMIZABLE & EFFICIENT

Continuing the “Every Participant” Solutions That Make Communication Tools Safe & Accessible.

Kiosk is CourtFact's in-office accessibility solution for participants and clients that may not have access to the Internet, a smartphone, or computer. Using a **simplified solution** similar to our Client Mobile application, clients have the ability to review and acknowledge important events, communicate with their case officer, and fill out reports before meeting with staff.

With customizable features added often, Kiosk allows agencies to provide a solution that can **streamline in-office operations** while providing access to information and communication tools for clients that may only be permitted use of electronic communication devices while under supervision.

FEATURES INCLUDE:

- Optional requirement of Facial ID for client login authentication
- Allow access if a client forgot credentials or is a new client
- Access to modules such as Events, Broadcast, & Financials
- Customized, on-demand enrollment & pre-meeting reports
- Direct email messaging to any assigned supervising officer
- Allow on-site status check-in for substance testing programs
