

COURTFACT[®]
TOOLS THAT INSPIRE SUCCESS

Your Court Is More Than a Case Record

Connect the people, programs &
operations behind every case.

COURTFACT

One Platform.

Total Program Visibility.

courtfact.com/courtadmin

One Court. Many Programs. Disconnected Systems.

Behind the Case Record

Your case management system maintains the official court record.

But the work supporting that record **happens everywhere**.

Each program may work—but when information is spread across separate systems, spreadsheets, vendors and processes, staff have more to maintain and Court Administration loses visibility.

Less fragmentation.
Better information.
Greater control.

CourtFact Brings the Entire Operation Together.

One Participant Record

Information follows the participant across programs and services.

Connected Departments

Give Pretrial, Probation, Specialty Courts and Judicial Officers access to the information relevant to their work.

Consistent Operations

Standardize workflows, communication, documentation and reporting.

Greater Visibility

See program activity, supervision information and operational data across the Court.

One Platform. Built Around Your Court.

CourtFact brings the tools your departments use every day into **one configurable platform.**

Case & Supervision Management

- Participant Records
- Conditions
- Contacts
- Case Notes
- Documents

Pretrial & Probation

- Assessments
- Supervision Workflows
- Appointments
- Compliance
- Court Reporting

Electronic Monitoring

- Location Monitoring
- Alcohol Monitoring

- Lab Integrations

Participant Engagement

- Automated Reminders
- Notifications
- Secure Communication
- Remote Data Collection
- Bio-Authentication

Program Operations

- Scheduling
- Custom Forms
- Task Assignment
- Financial Management
- Treatment Tracking

Technology That Adapts to Your Operation.

CourtFact can be configured around your programs, policies and workflows—so your Court isn't forced to change the way it operates just to accommodate its software.

**Choose the programs you need. Connect the systems you already use.
Keep the information together.**
